## New! FreeStyle T44 LED DMX

**BURBANK, CA** – Kino Flo's **FreeStyle T44 LED DMX** and **FreeStyle LED Tubes** join the Kino Flo family line of LED soft lights.

The FreeStyle T44 fixture together with the specially designed LED tubes display Kino Flo's True Match white light and RGBWW color management system found in Kino Flo's LED softlight fixtures. With the built-in intensifying reflector the LED tubes project light at 100° beam angle. The lightweight LED tubes can also operate independently outside the fixture and project soft light at a 310° beam angle. The unique built-in aluminum rail system acts as access points for mounting options allowing the LED tubes to be rigged into custom lighting designs.

Operating on the same software technology as with all Kino Flo's LED fixtures, the FreeStyle remote controller has four Menu options, one white, two color menus and FX (Effects). Features include: Kino Flo presets and custom settings from **2500K to 9900K**; **Green/Magenta** control, **Hue Angle** and **Saturation**, **RGB** (red, green and blue) and **FX** (Effects) control features. The new FreeStyle T44 system also comes with standard DMX and wireless DMX (Lumen Radio®), and universal voltage input 100-240VAC or 24VDC.

The fixture includes a 90° Honeycomb Louver. The FreeStyle T44 system is available now as a 2-Unit Gaffer Kit and as single kits with soft case or travel case.

### Key features are:

- Kelvin presets & custom settings, 2500K-9900K
